

Thank You for you purchase from SynthGraphics!

BCR INSTALLATION INSTRUCTIONS:

Make sure the surface is clean, I recommend you wipe the entire surface with Isopropyl Alcohol first. Do not touch the surface after cleaning. Installation is very easy but the top piece needs more attention. Since the top part is curved make sure you start at the very top rather than the bottom. Apply pressure to the very top to make sure it adheres to the slight curve.

Enjoy!

Jamie
